S: in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes

NP: in case that a species is no longer present in the site enter: x (optional)

Type: p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)

Other Site Characteristics

Il sito rappresenta uno degli ultimi esempi di ambiente fluviale. E' costituito da un ampio bosco ripariale circondato da pareti rocciose strapiombanti sulla Valle dell'Adige. Vi nidificano e svernano numerose specie di uccelli.

4.2 Quality and importance

Elevato valore faunistico grazie alla presenza concomitante del bosco ripariale e delle circostanti pareti rocciose. Nell'area nidificano e svernano numerose specie di uccelli. Presenza storica di invertebrati dell'allegato II (anche prioritari) e ora in forte declino, legati sia a siti umidi che a vecchi alberi di latifoglie di fondovalle. Presenza storica di invertebrati dell'allegato II indicatori di zone umide integre, in forte declino. Presenza di invertebrati dell'allegato II che indicano buona naturalità delle acque correnti.
