Group: A = Amphibians, B = Birds, F = Fish, I = Invertebrates, M = Mammals, P = Plants, R = Reptiles
S: in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes

NP: in case that a species is no longer present in the site enter: x (optional)

Type: p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)

Unit: i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))

Abundance categories (Cat.): C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information

Data quality: G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

Other Site Characteristics

L'area comprende il passo che separa il Tesino dalla Valle del Vanoi e i modesti rilievi verso settentrione. Le fasce interessate sono la montana superiore e la subalpina. Sui calcari prevalentemente giurassici si trovano aree a pascolo, boschi di conifere e un rilievo con roccette di vetta. Habitat 6210 prioritario (stupenda fioritura di orchidee) presente solo in tracce.

4.2 Quality and importance

La facilità d'accesso rende l'area - assai varia dal punto di vista vegetazionale e ricca di specie interessanti - adatta ad un uso di tipo didattico. Area di interesse internazionale per il transito di molte specie migratrici a medio e lungo raggio nel periodo tardo estivo e autunnale (migrazione post-riproduttiva). Valico di interesse internazionale per il transito di molte specie migratrici a medio e lungo raggio nel periodo tardo estivo e autunnale (migrazione post-riproduttiva).
