**S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes

**NP:** in case that a species is no longer present in the site enter: x (optional)

**Type:** p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)

**Unit:** i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))

**Abundance categories (Cat.):** C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information

**Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

### Other Site Characteristics

Valico (Bocca di Caset) e rilievo (Cima Caset) lungo la cresta calcarea tra il Monte Corno e il Corno Spezzato, pochi km a NNE di Passo Tremalzo. Vegetazione con chiara disimmetria di versante: bosco di conifere su quello esposto a NW, faggeta con zone erbose su quello esposto a SE.

### 4.2 Quality and importance

L'effetto di vetta e gli antichi disboscamenti consentono l'insediamento di praterie (Seslerieti), in parte

rocciosi, ricchi di specie endemiche a baricentro occidentale. La bocca di Caset rappresenta forse il valico di maggiore importanza delle Prealpi Trentine per quel che riguarda il passaggio di uccelli migratori.
