- **Group:** A = Amphibians, B = Birds, F = Fish, I = Invertebrates, M = Mammals, P = Plants, R = Reptiles
- **S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes
- **NP:** in case that a species is no longer present in the site enter: x (optional)
- **Type:** p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)
- **Unit:** i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))
- **Abundance categories (Cat.):** C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information
- **Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

3.3 Other important species of flora and fauna (optional)

Species			Population in the site					Motivation						
Group	CODE	Scientific Name	S	NP	Size		Unit	Cat.	Species Annex		Other categories

Total Habitat Cover	100

Other Site Characteristics

Vasta area montana delle Alpi centrali solcata, nella Provincia di Trento, da tre valli alpine di origine glaciale del versante meridionale del gruppo dell'Ortles-Cevedale. La testata delle valli é delimitata da una cerchia di cime che raggiungono i 3.000 m e gli ambienti sono caratterizzati da un alternarsi di circhi glaciali che ospitano laghetti alpini e piccole torbiere. Sono presenti vasti ghiacciai e imponenti depositi morenici. La vegetazione è rappresentata da foreste di conifere larice cembro e abete rosso, interrotte da vaste radure pascolive di origine secondaria, alle quali in alta quota seguono brughiere subalpine e pascoli alpini. Sono presenti habitat di particolare interesse compresi nell'all.I della direttiva 92/43/CEE, in particolare: Calamagrostio villosae - Abietetum albae, Caricion fuscae

4.2 Quality and importance

Stupendi esempi di vallate alpine in gruppo montuoso metamorfico, con circhi glaciali e imponenti apparati morenici laghetti, torbiere e fenomeni crionivali di straordinario interesse, oltre che per l'aspetto paesaggistico, anche per l'osservazione del dinamismo della vegetazione pioniera. Stato di conservazione ottimo degli ecosistemi di alta quota, che sono praticamente intatti. Il sito è di rilevante interesse nazionale e/o provinciale per la presenza e la riproduzione di specie animali in via di estinzione, importanti relitti glaciali, esclusive e/o tipiche delle Alpi.

5. SITE PROTECTION STATUS (optional)

5.1 Designation types at national and regional level:

[Back to top](#)

Code	Cover [%]	Code	Cover [%]	Code	Cover [%]
IT00	2.0	IT01	98.0		

5.2 Relation of the described site with other sites:

designated at national or regional level:

Type code	Site name	Type	Cover [%]
IT01	Alta Val del Monte	*	
IT01	Alta Val La Mare	+	
IT01	Alta Val di Rabbi	*	

6. SITE MANAGEMENT

6.1 Body(ies) responsible for the site management:

[Back to top](#)

Organisation:	Consorzio Parco Nazionale dello Stelvio - Settore Trentino
Address:	Loc. Cogolo - 38020 Pejo (TN)
Email:	Dirigente.tn@stelviopark.it

6.2 Management Plan(s):

An actual management plan does exist:

<input type="checkbox"/>	Yes	Name: in preparazione Link: _____
<input checked="" type="checkbox"/>	No, but in preparation	
<input type="checkbox"/>	No	

7. MAP OF THE SITES
